Instructions for use Symphomy and Lactina One-Day Pump Set

Verwendungszweck
Abpumpen von Muttermilch mit der Symphomy oder Lactina Milchpumpe von Medela.

Important Safeguards
Read all instructions before use. This is a single user product. Use by more than one person may present a health risk as the components cannot be sterilized for safe re-use between multiple users.

- Follow the cleaning instructions unless you are told otherwise by your healthcare professional.
- Do not use when package is opened or damaged prior to first use.
- Use Medela original accessories only.
- Never leave accessories unattended and keep out of reach of children.
- If problems or pain occur, consult your lactation consultant or physician.
- For further information refer to Symphomy or Lactina instructions for use.

Application
Choose the right breastshield size for maximum comfort and efficiency while pumping. For breastshield fitting guidelines refer to Symphomy or Lactina instructions for use.

Additional for use with Symphomy, Symphomy Membrane Cap and Protective Membrane. For use with Lactina, Lactina Flange Cylinder and/or, Cylinder Holder. We recommend that you use these extra parts regularly or in case of an overflow, immediately.

- Assemble all parts, connect with breastpump and start pumping.

Important
A new Symphomy and Lactina One-Day Pump Set is required:
– for each mother,
– after a maximum of 8 pumping sessions within 24 hours
– every 24 hours
– if milk accidentally gets into the tubing
– if parts are missing or damaged

Important
A new disposable breastmilk bottle is required:
– for each pumping session.

Assembly/Disassembly instructions

Cleaning and Hygiene
Important
Use drinking water quality for cleaning.
Disassemble all parts that come in contact with the breast and breastmilk immediately after use to avoid dry up of milk residues and to prevent growth of bacteria.

Caution
This Symphomy and Lactina One-Day Pump Set is not autoclavable.
Use of other sanitizing methods (e.g. cold water disinfection) is not recommended and may damage some parts.

Prior to first use
The Symphomy and Lactina One-Day Pump Set does not need cleaning prior to first use as it is provided sterile.

Each after use
Check whether there is milk in the tubing. If so, replace the tube. If not, proceed as follows:
1. Rinse with cold clear water. Note that the other parts do not need cleaning.
2. Dry the parts with a clean towel. Put all parts in a clean Storage bag (not air) or in a clean environment.

Nach jedem Gebrauch
Überprüfen Sie, ob sich Milch im Schlauch befindet. Wenn ja, muss das Pumpset ersetzt werden. Wenn nicht, gehen Sie wie folgt vor:
1. Zuerst mit kaltem, klarem Wasser (ca. 20 °C) und reinigen Sie diese Teile anschließend mit viel warmem Wasser (mindestens 30 °C).
2. Spülen Sie alle Teile mit kaltem, klarem Wasser nach. Die anderen Bestandteile müssen nicht gereinigt werden.
3. Trocknen Sie die Teile mit einem sauberen Tuch. Legen Sie alle Teile in einen sauberen Aufbewahrungssack (nicht luftdicht) oder in einen sauberen Ort.

Material: Breastshield and Connector (Polypropylene), Valve Membrane (Thermoplastic elastomer), Tubing (Polyvinyl chloride).

Disposal: According to local regulations.
CE-mark according to 93/42/EEC

Motherlich aufbewahren / aufzauen
Flasche mit Name, Datum/Zeitpunkt des Abpumpens und der Milchmenge beschriften.
Für Hinweise zur Aufbewahrung und zum Auftauen finden Sie in der Gebrauchsanweisung für Symphomy oder Lactina, oder wenden Sie sich an Ihr Krankenhaus.

Material: Brusthaube und Verbindungsstück (Polypropylen), Ventilmembran (Thermoplastisches Elastomer), Schlauch (Polyvinylchlorid).

Entsorgung: Gemäss lokalen Vorschriften.
Label CE attestant la conformité à la norme 93/42/CEE

CE-Kennzeichnung nach 93/42/EEG
